---> Comment Text :
I am afraid for our planet, for our children, for their children and their children.
The legacy we are leaving them is atrocious. Our land is filled with chemicals, the
1 air is polluted, the water getting worse every day, etc, etc. Yucca Mountain, it seems
2 to me, is a most unlikely place...being that it's near a fault line. I know it needs
to go somewhere but the quicker we use other forms of energy and get rid of nuclear
weapons forever the sooner the better.
